

Queska Corporate Travel Integration Brief

Meeting Date: June 18, 2026 **Participants:**

- **Liam Hayes** (Enterprise Deployment Lead, Queska Travel Intelligence)
- **Olivia Trent** (Chief Operating Officer, Horizon Corporate)

Liam Hayes: Hi Olivia. Bringing Queska's AI travel companion into Horizon Corporate is going to completely automate how your executives manage disruptions, itineraries, and expenses. Today, I want to map out the technical integration and beta launch.

Olivia Trent: Hi Liam. My priority is ensuring this integrates seamlessly with our current policies. Our executives travel globally, and they hate friction. If the AI hallucinates a flight gate or mismanages a visa requirement, it's a massive problem.

Liam Hayes: Precision is our core feature. Let's establish the timeline. To start, our Document Agent will draft the corporate travel policy integration summary by **June 20, 2026**, mapping Queska's logic to your rules.

Olivia Trent: I will provide our preferred airline, hotel vendor list, and corporate card constraints by **June 21, 2026**.

Liam Hayes: Based on those preferences, the Document Agent will generate a sample Paris itinerary proposal for your CEO by **June 23, 2026**. This will show you exactly how Queska formats multi-leg international trips.

Olivia Trent: I will review the sample itinerary on **June 24, 2026** to ensure the tone and formatting meet our executive standards.

Liam Hayes: As a stress test for international compliance, the Document Agent will draft a comprehensive visa requirement brief for the upcoming Dubai conference by **June 25, 2026**.

Olivia Trent: My executive assistant, Mark, will collect and securely upload the executives' passport details to the vault by **June 26, 2026**.

Liam Hayes: I will configure Queska's real-time flight tracking API to sync with those profiles by **June 27, 2026**. This ensures they get instant rebooking options if a delay occurs.

Olivia Trent: What about post-trip logistics? The receipt gathering is a nightmare.

Liam Hayes: We handle that autonomously. The Document Agent will compile the automated expense template mapping by **June 28, 2026**, linking Queska's receipt scanning to your ledger codes.

Olivia Trent: I will test the expense template in our accounting software environment on **June 30, 2026**.

Liam Hayes: I will finalize the mobile app push notifications for gate changes and weather alerts by **July 1, 2026**.

Olivia Trent: Assuming the app is ready, I will select five executives for the initial beta group by **July 2, 2026**.

Liam Hayes: I will send out the Queska beta onboarding links to those five executives on **July 3, 2026**.

Olivia Trent: The beta group will submit their initial feedback and usability scores by **July 6, 2026**.

Liam Hayes: The Document Agent will process that feedback and draft the comprehensive Q3 travel budget projection report by **July 8, 2026**, demonstrating the cost savings of the AI companion.

Olivia Trent: I will present the budget report to the board for global rollout approval on **July 10, 2026**.

Liam Hayes: Once approved, the Document Agent will generate the final service-level agreement (SLA) for the global enterprise rollout by **July 12, 2026**.
