

TalentPort Recruitment Strategy Session

Meeting Date: June 18, 2026 **Participants:**

- **Chloe Tan** (Account Executive, TalentPort)
- **Julian Vance** (VP of Engineering, Nexus Tech)

Chloe Tan: Julian, it's great to connect. Nexus Tech is scaling rapidly, and utilizing TalentPort's AI-assisted sourcing and 15% flat-fee model is going to save you both time and capital. Our goal today is to lock in the timeline for hiring your new frontend and DevOps engineering units.

Julian Vance: Thanks, Chloe. We need candidates in seats fast, but they have to be highly vetted. Traditional agencies take weeks just to send a resume. How quickly can your platform move?

Chloe Tan: We move in days. Let's build the schedule. First, I will assign our Document Agent to draft the 5 required Job Descriptions based on your tech stack by **June 19, 2026**.

Julian Vance: I will review and approve those JDs by **June 20, 2026**.

Chloe Tan: Great. Next, the Document Agent will generate the AI screening scorecards tailored to those specific engineering roles by **June 21, 2026**. This tells our AI exactly what technical competencies to listen for.

Julian Vance: Cultural fit is just as important as technical skill. I will send you our internal cultural guidelines by **June 22, 2026**.

Chloe Tan: I will use those guidelines to calibrate the KitaHQ AI video interviewer by **June 23, 2026**, ensuring the AI evaluates soft skills effectively. Once the system is calibrated, I will officially launch the sourcing campaign across LinkedIn and our proprietary talent database on **June 24, 2026**.

Julian Vance: How soon do we see the actual candidates?

Chloe Tan: By **June 27, 2026**, the Document Agent will compile the first batch of candidate interview summaries. You won't just get resumes; you'll get full candidate packs with AI-scored insights and video transcripts.

Julian Vance: My hiring managers will review the candidate packs on **June 29, 2026**. If they see potential, we will want to move to human-led final rounds immediately.

Chloe Tan: Understood. The Document Agent will draft the final round interview schedules and calendar invites for your team by **June 30, 2026**.

Julian Vance: We will conduct the final technical interviews on **July 2, 2026**.

Chloe Tan: I will collect all post-interview feedback and technical assessments from your team on **July 3, 2026**.

Julian Vance: We will convene and make our final hiring selections by **July 4, 2026**.

Chloe Tan: Excellent. The Document Agent will draft the official offer letters for the selected candidates by **July 5, 2026**, ensuring all local compliance and equity terms are included.

Julian Vance: I will sign the offer letters and authorize the compensation packages on **July 6, 2026**.

Chloe Tan: After they accept, the Document Agent will prepare the comprehensive onboarding documentation packets by **July 8, 2026**.

Julian Vance: And finally, I will initiate their internal system access and Slack provisioning on **July 10, 2026**.
